

Herbalife Nutrition Enters the Hemp-Cannabinoid Skincare Market with their New Enrichual Line Available in the US

November 5, 2020

LOS ANGELES--(BUSINESS WIRE)--Nov. 5, 2020--

Herbalife Nutrition (NYSE:HLF), a premier global nutrition company, today introduced Enrichual, a new line of topical skincare products formulated with hemp-cannabinoids, including Hemp Relief Balm and Hemp Facial Serum to help consumers nurture their bodies and minds. With the launch of its Enrichual line, the Company enters the rapidly growing hemp-cannabinoid market, whose U.S. sales are forecasted to reach \$12.4 billion by 2023 (Brightfield Group).

"The cannabinoid market is a new space for us and we're excited that Enrichual inspires consumers to practice self-care and nurture their body and mind," said Ibi Montesino, senior vice president and managing director of North America, Herbalife Nutrition.

Environmental stressors can cause your skin to look aged and dry and can contribute to the appearance of fine lines. Enrichual enables consumers to treat themselves to a calming and skin-rejuvenating experience.

"The Enrichual products are formulated with broad-spectrum cannabinoids, rich botanicals and essential oils nurture and restore the skin, and make it an experience for all the senses," said John Heiss Ph.D., senior director of Worldwide Product Marketing Innovation, one of the scientists behind the new product line.

The ingredients in the products work to moisturize the skin. The products do not contain added parabens or sulfates, and formulations have been dermatologist-tested for safety. Additional product details include:
