¹ Growth/decline in net sales excluding the effects of foreign exchange is based on "net sales in local currency," a non-GAAP financial measure. See Schedule A – "Reconciliation of Non-GAAP Financial Measures" for a discussion of why we believe adjusting for the effects of foreign exchange is useful.

 2 Adjusted diluted EPS and adjusted EBITDA are non-GAAP measures. See Schedule A – "Reconciliation of Non-GAAP Financial Measures" for a detailed reconciliation of these measures to the most directly comparable GAAP measure, and a discussion of why we believe these non-GAAP measures are useful.

Management Commentary

Herbalife reported first quarter 2023 net sales of \$1.3 billion, down 6.3% year-over-year, or a 2.6% decline on a constant currency basis¹. First quarter net income of \$29.3 million and adjusted EBITDA² of \$128.9 million was negatively impacted by lower sales, continued input cost inflation and the timing of distributor event spending, partially offset by improved pricing. In addition, first quarter gross profit margin of 76.2% was negatively impacted by currency headwinds of approximately 150 bps year-over-year. Diluted EPS was \$0.29 for the first quarter, with adjusted diluted EPS¹ of \$0.54, which included a \$0.32 year-over-year currency headwind.

Engagement with distributors remained strong, as more than 700 in-person events worldwide attracted more than 400,000 attendees, year-to-date through April 30. For the first time in three years, approximately 2,700 of the Company's independent distributor leaders from around the world gathered in Los Angeles and were given a preview of the Company's modernized branding and plans for expanding product offerings. The Company's digital transformation initiative remains on track, as launch plans were solidified for modernized websites and a new e-commerce platform.

"The return of in-person events have engaged more than 400,000 attendees this year, building strong momentum and driving increased engagement in our business," said Chairman and CEO, Michael Johnson. "We expect this energy to drive continued improvement in our top line, resulting in growth by the end of the year."

The Company continues to make significant progress in productivity through its Transformation Program, which was initiated in 2021 to strategically optimize global business processes. The Company's actions to date result in approximately \$35 million of savings in 2023 and it is on track to exceed \$70 million of total program run rate savings in 2024 and beyond.

In April, the Company amended its Senior Secured Credit Facility, which among other things, increased the gross leverage ratio covenant from 3.75 to 4.50 effective through December 31, 2023, stepping down to 4.25 as of March 31, 2024 and 4.00 thereafter. This will provide greater financial flexibility to make investments in key initiatives. As of March 31, 2023, the related gross leverage ratio was approximately 3.6. The Company was compliant with all debt covenants as of March 31, 2023.

"We have taken steps to protect profitability and secure our balance sheet in order to provide flexibility to execute on our strategic plan and return to growth," said Chief Financial Officer, Alex Amezquita. "Our capital allocation priorities remain unchanged as we take steps to achieve a long-term target gross leverage ratio of 3.0x."

In a separate announcement today, the Company announced updates to its leadership succession plan. The Company is announcing the retirement of Chief Operating Officer, Mark Schissel following 16 years of dedicated service. Frank Lamberti will be appointed to Chief Operating Officer, Ibi Montesino, EVP and Chief of Staff, will have increased management authority and Rob Levy, will be appointed Regional President Americas. These changes are all effective as of July 1, 2023 and will report to Michael Johnson.

Supplemental Information

SCHEDULE A: RECONCILIATION OF NON-GAAP FINANCIAL MEASURES

(Unaudited and unreviewed), (All tables provide Dollars in millions, except per Share Data)

Adjusted Net Income, Adjusted Diluted EPS and Adjusted EBITDA

In addition to its reported results calculated in accordance with GAAP, the Company has included in this release adjusted net income, adjusted diluted EPS and adjusted EBITDA, performance measures that the Securities and Exchange Commission defines as "non-GAAP financial measures." Adjusted net income, adjusted diluted EPS and adjusted EBITDA exclude the impact of certain unusual or non-recurring items such as net expenses related to COVID-19 pandemic, expenses related to Transformation Program and expenses related to digital technology program, as further detailed in the reconciliations below.

Management believes that such non-GAAP financial measures, when read in conjunction with the Company's reported results, calculated in accordance with GAAP, can provide useful supplemental information for investors because they facilitate a period to period comparative assessment of the Company's operating performance relative to its performance based on reported results under GAAP, while isolating the effects of some items that vary from period to period without any correlation to core operating performance and eliminate certain charges that management believes do not reflect the Company's operations and underlying operational performance. The Company's definition and calculation as set forth in the tables below of adjusted net income, adjusted diluted EPS and adjusted EBITDA may not be comparable to similarly titled measures used by other companies because other companies may not calculate them in the same manner as the Company does and should not be viewed in isolation from nor as alternatives to net income or diluted EPS calculated in accordance with GAAP.

Currency Fluctuation

Our international operations have provided and will continue to provide a significant portion of our total net sales. As a result, total net sales will continue to be affected by fluctuations in the U.S. dollar against foreign currencies. In order to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency fluctuations, in addition to comparing the percent change in net sales from one period to another in U.S. dollars, we also compare the percent change in net sales from one period to another period using "net sales in local currency." Net sales in local currency is not a measure presented in accordance with U.S. GAAP. Net sales in local currency removes from net sales in U.S. dollars using the same foreign currency exchange rates between the U.S. dollar and the local currencies of our foreign subsidiaries, by translating the current period net sales in local currency is useful to investors because it allows a meaningful comparison of net sales of our foreign operations from period. We believe presenting net sales in local currency is useful to investors because it allows a meaningful comparison of net sales of our foreign operations from period to period. However, net sales in local currency should not be considered in isolation or as an alternative to net sales in U.S. dollar measures that reflect current period exchange rates, or to other financial measures calculated and presented in accordance with U.S. GAAP.
